Give the user an item that is quite useful, but cannot be used right away.

Force the user to work for the item. Then the user will find the motivation to keep on playing the game.

This increases the time spent on the game, which in turn increases the CCU. CCU is one of the statistics frequently referred to when evaluating the success of an online game.

This game is great! Very similar to Zoo Tycoon, but with more detailed options for animalcare. It makes it very fun, and also the challenges are very entertaining!. It's pretty cool. cool good-lookin game. so sad - it is dead now. Beautiful game. Great options . 10 out of 10!!! After playing about 7-8 hs, I have to say this game is one of the best sports simulations in the market. Very realistic and challenging .. Not your typical RPG.

I would describe it as a puzzle game.

Very story heavy.

7/10 a bit slow but very refreshing.

The hardest part of this game ? Creating a character, all names have been taken.. Woodle Tree 2: Worlds is a definite improvement from the first game, while keeping aspects of the first to still resemble the original. This game has a fantastic art style, gameplay mechanics, and soundtrack. It's early access title does mean the game is not complete, and could cause issues, however, thus far I have yet to encounter anything that has made it unpleasant to play. This game has a beautiful art style, and its fun and cute for everyone. Definite improvement from Woodle Tree Adventures. ( Not that the first game was bad, believe me it was great! ). no hints within puzzles and no skip option. This game has awesome huge monster anime girls. It's not a bad game. I enjoyed the puzzles, they weren't too hard or too easy. I did have to use hint on a few puzzles. I had to use the hint button to figure out where to go a few times because there was a lot of back and forth and constant jumping around from location to location. I enjoyed this game in casual mode and I plan to play it again in expert mode.. Pretty much love everyone of these 8-bit games be Petroglyph. From community relationship, to game balance, to game development, to informing the fans, pretty much Petroglyph is doing everything perfectly with this series!

There are no words regarding how much love is poured and felt in this series. The moment you start any of these games you know you're in something rather excellent! Just try it!. This game feels unfinished. Gameplay is repetitive. Maps and locations are dull and troops classes doesn't give you much in a strategy. Sister told me to play

10/10. This game = Lags, glitches, poor battle experiences. No grinding you said? that is BS. You will be grinding on mobs for skills and pigments. You have to grind on events to obtain materials in order to craft gears. You will be spending 80% of your game time grinding and 20% on losing your loots and getting killed by players in group. What is ridiculous is that you are only allowed to gain certain amount of exp from items and killing mobs each day. So many things are glitched at this moment, for example, earth wall does not properly block mobs as some mobs can just squeeze pass walls. Gravitry well often does not apply slow on palyers and does not suck them toward the center. In terms of balance, it seems like sickle is the most useful and probably most powerful weapon atm. it is capable of killing mobs in group and doing some good 2 VS 1 while other weapons are just eating♥♥♥♥♥♥♥♥ Did i mention that you are constantly being blocked and stucked by little rocks, plants, and sometimes buildings on the path ? that probably happens like every 5 minutes !! The contol in this game is extremely clunky and not smooth, even MapleStory is smoother than this.

All and all, they want you to spend money to support them and reserve for future spots and names. I honestly do not think this game can even last that long unless they are willing to polish the contorls and improve the concept of this game so it is playable and enjoyable.

. It has a high ping.
